OUR SERVICES

ISO 9001:2015
Quality Management System

ISO 9001 is an international Standardization The basic fundamentals That paled That set the standard Quality Management System, previously Present Currently the latest version WITH Namely ISO 9001: 2015. Approach Method ISO 9001. Using the approach Process (Process Approach), system approach (system approach) And Also using Pattern Plan - Do - Check - Action (PDCA) - Continuous Improvement.

ISO 14001:2015
Environmental Management System

ISO 14001 is an international standard for Environmental Management System. The ISO 14001 certification is a tool that enables organizations to meet environmental obligations and communicate with customers that environmental improvements are being achieved. Now the ISO International Agency has issued the latest version of ISO 14001: 2015.

# ISO 45001:2018 | Health and Safety Management System

ISO 45001:2018 specifies requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use, to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its OH&S performance. ISO 45001:2018 is applicable to any organization that wishes to establish, implement and maintain an OH&S management system to improve occupational health and safety, eliminate hazards and minimize OH&S risks (including system deficiencies), take advantage of OH&S opportunities, and address OH&S management system nonconformities associated with its activities.

ISO 22000:2018 Certification
Food Safety Management System

This standard specifies requirements for the Food Safety Management System (ISO 22000). This is related to the presence of food hazards at the point of food consumption. The requirements are in generic standards and apply to every size organization.

ISO/IEC 20000-1:2018 Certification IT Service Management System

ISO 20000-1 is the first international standard for Information Technology Service Management (ITSM IT Service Management). This standard is based on and is intended to replace the British Standards BS 15000. This standard was first published in December 2005.

ISO/IEC 27001:2013 Certification Information Security Management System

ISO 27001 ISMS (Information Security Management System) is a standard specifically structured on information security is recognized internationally and now it appears a new version of ISO / IEC 27001: 2013.

Security information can be achieved by performing a control that consists of policies, processes, procedures, organizational structure, as well as the functions of the IT infrastructure. In other words, ISO / IEC 27001 is a way to protect and manage information based on a systematic approach to business risks, to prepare, implement, operate, monitor, review, maintain and improve information security.

ISO 13485:2016 Certification Medical Devices System

ISO 13485 is the International Standard Organization issued in 2016, representing the requirements of a comprehensive quality management system for the design and manufacture of medical equipment. This standard replaces previous documents such as EN 46001 and EN 46002 (both 1997), previously issued ISO 13485 (1996 and 2003), and ISO 13488 (also 1996).

ISO 37001:2016
Anti-Bribery Management System

ISO 37001 is the new international standard designed to help organizations implement an anti-bribery management system. It specifies a series of measures your organization can implement to help prevent, detect and address bribery.

Designed to be integrated into your organization's existing management processes and controls, ISO 37001 also follows the common ISO structure for management system standards, for easy integration with ISO 9001 for example.

ISO 50001:2018
Energy Management System

ISO 50001 is an energy management system that is recognized internationally. This is the first global energy management system after so many standards issued at national and regional scope. ISO 50001-based model management system that has been conceived and implemented by organizations around the world. The standard provides an effective framework to optimize energy usage and establish the organization's commitment to continuously improve energy management. ISO estimates that this standard may affect 60% of all energy use worldwide.

ISO 31000:2018
Risk Managemement

ISO 31000 is the international standard for risk management. By providing comprehensive principles and guidelines, this standard helps organizations with their risk analysis and risk assessments. Whether you work in a public, private or community enterprise, you can benefit from BS ISO 31000, because it applies to most business activities including planning, management operations and communication processes. Whilst all organizations manage risk to some extent, this international standard's best-practice recommendations were developed to improve management techniques and ensure safety and security in the workplace at all times.

HACCP
Hazard Analysis Critical Control Point

HACCP is a management system in which food safety is addressed through the analysis and control of biological, chemical, and physical hazards from raw material production, procurement and handling, to manufacturing, distribution and consumption of the finished product.
